

Working Prototype Known Problems Report

Product: Run And Track

Team: Running Man

07/23/19

Functions:

1. End button is pressable even if there is no running data recorded in the Running Mode page. By pressing the End button without clicking start will direct the user to the Running Record page with all fields equal to 0. The map will also become invisible.
2. When the user gets into the Running Mode Page, the map won't automatically zoom in to the current location until the user presses the 'Start' button or 'My Location' button.
