Sprint 3 Report

Product Name: Run & Track
Team Name: Running Man
07/23/19

Actions to stop doing: If we had an extra sprint we should stop overloading the sprints. Since sprint 3 was our last sprint we overloaded it on purpose to be ambitious, and in case we finished the basics in time. However, if this was not our last sprint we would not have overloaded it and would've pushed some tasks to the next sprint in order to be more realistic.

Actions to start doing: We don't feel that there is anything extra we can do at this point in our team process. Each member of our group is progressing according to the plan that we set up, and we all feel that each is doing their part. Together as a team we are working well and have improved our weakness of lists in week 1.

Actions to keep doing: As a team, we should keep our communication open and frequent. The team's constant updates on commits, bugs, updates, etc. are useful for staying on track. We should also keep our frequent meetings as it assists tremendously in the debugging and organization process.

Work completed:

Google Map implementation	User Story 1 - Task 1, 2
Google Map current location	User Story 1 - Task 2
Google Map location on End button	User Story 2 - Task 4
Google Map location on Cancel button	User Story 2 - Task 3
Google Map in Record page	User Story 3 - Task 1
GPS internal state testing	User Story 4 - Task 1

Work not Completed:

Google Map Automatically Zoom	User Story 1 - Task 3
Google Map route drawing	User Story 2 - Task 1, 4
Automated testing with espresso	User Story 4 - Task 2
Google Map storage in database	User Story 3 - Task 2, 3

Work completion rate: We had completed a total of ~50% user stories for Sprint 3.

The total hours we spent on each user story is listed in the following list:

User Story 1: 6-8 hours each person
User Story 2: 3-4 hours
User Story 3: 3-4 hours
User Story 4: 30 minutes

The total ideal work hours are 16 hours. However, the exact amount of hours spent on user stories is 16.5 hours.

Meeting Hours:	16 hours
Scrum Meeting:	1 hour

Number of Days During Sprint:	7 days
Average User Stories Per Day:	0.5 story
Ideal Average Work Hours Per Day:	2-3 hours
Average Hours (Working+ Meeting) Per Day:	4-5 hours
